

Explanation:

Module was run and assessed using an interactive NLP textbook hosted on jupyter/ github

This can be found on: <https://github.com/uclmr/stat-nlp-book>

3 projects were undertaken. For each project the jupyter notebook file is provided and where possible a pdf of this. Alternatively a python file containing the code is also provided, but best to view the work using jupyter. For task 3 an additional report file is provided.
